

What we can add without government APIs

SIH Problem Statement 26100 | BharatBid website | No GSTN, MCA, GeM, PAN, IT, EPFO, ESIC, NSIC, or DigiLocker access

18

Can add now (of 19 leftover)

7

No new portal needed

11

DEMO adapters to add

0

Live government APIs we can add

Bottom line
Bottom line: all 19 leftover PS items can be added as DEMO / SYNTHETIC website features. Zero live government databases can be added. Highest value first: Compliance Score, Risk Level, AI advisory, and dashboard fields (no portal). Then DEMO adapters for GST returns, PAN, IT, EPFO, ESIC, NSIC, blacklist, and DigiLocker - all labeled DEMO, officer still decides. Already in the website: 7 items (Udyam, GST registration, MCA21, documents, tender requirements, audit, officer decision).

Per feature

Feature	Can we add it now?	How, without government APIs	Still blocked until live APIs
GST return filing status	Add now (DEMO adapter)	Yes. DEMO GSTR filing snapshot (filed / not filed / delayed) next to the existing GST registration adapter.	Live GSTN return-filing API.
PAN registry lookup	Add now (DEMO adapter)	Yes. DEMO PAN adapter, same pattern as GSTIN / CIN / Udyam.	Live NSDL / Income Tax PAN API.
Income Tax compliance	Add now (DEMO adapter)	Yes. DEMO ITR / PAN-IT status fixture. Label DEMO / SYNTHETIC.	Live Income Tax e-filing API.
EPFO	Add now (DEMO adapter)	Yes. DEMO EPFO adapter + document type + tender requirement.	Live EPFO portal.
ESIC	Add now (DEMO adapter)	Yes. DEMO ESIC adapter + document type + tender requirement.	Live ESIC portal.
Startup India / DPIIT	Add now (DEMO adapter)	Yes. DEMO DPIIT recognition lookup. Requirement already exists on tenders.	Live Startup India / DPIIT API.
NSIC	Add now (DEMO adapter)	Yes. DEMO NSIC registration adapter + requirement.	Live NSIC API.
Blacklisting / debarment	Add now (DEMO adapter)	Yes. DEMO GeM / CPSE debarment list. Also fills the empty GeM adapter.	Live GeM debarment feed.
GeM seller status	Add now (DEMO adapter)	Yes. Adapter already exists and is empty. Add synthetic GeM records.	Live GeM seller API.
BIS	Add now (DEMO adapter)	Yes. DEMO BIS licence / standard fixture where the tender asks for it.	Live BIS API.
DigiLocker	Add now (DEMO adapter)	Partial honesty: a DEMO authenticity flag on uploaded files (issued / not issued). Must stay labeled mock.	Real DigiLocker pull of government-issued documents.
Make in India / local content	Add now (no portal)	Yes. Read the declaration document and record Class I / II / not declared. No portal required.	Live MII portal confirmation.
OEM authorization check	Add now (no portal)	Yes. Structured fields (OEM name, product, validity) plus match/mismatch vs bid claims.	Live OEM or brand portal.

Feature	Can we add it now?	How, without government APIs	Still blocked until live APIs
Overall Compliance Score	Add now (no portal)	Yes. Deterministic score from evidence coverage, demo-source matches, gaps, and open reviews. Must stay labeled decision-support, not an official government score.	A score backed by live government data.
Risk Level	Add now (no portal)	Yes. Low / Moderate / High from mismatches, missing mandatory evidence, and source errors. Same honesty rules as Officer Review Priority.	A certified fraud or bidder-risk model from government data.
AI recommendation to the officer	Add now (no portal)	Yes. Advisory text from existing gaps + optional LLM (already in the repo). Officer still decides. Never auto qualify / disqualify.	A recommendation grounded in live portal facts.
Compliance Dashboard fields	Add now (no portal)	Yes. Command Center already exists. Add score, risk, pending requirements, and the AI advisory on top of current KPIs.	Dashboard numbers from live government systems.
AI missing / inconsistent information	Add now (no portal)	Yes. Already partial (cross-checks + requirement intelligence). Can run AI extraction on uploaded docs without any government API.	Cross-check against live portal payloads.
Live government portal integration	Cannot add live	No live APIs. You can only add more DEMO adapters (GST-style).	GSTN, MCA21, Udyam, GeM, PAN, IT, EPFO, ESIC, NSIC, DigiLocker production access.
Udyam / MSME (already in)	Already in website	Already in as DEMO Udyam.	Live Udyam portal.
GST registration (already in)	Already in website	Already in as DEMO GST.	Live GSTN registration API.
MCA21 (already in)	Already in website	Already in as DEMO MCA.	Live MCA21 API.
Document extraction / mapping (already in)	Already in website	Already in.	Real DigiLocker authenticity.
Tender-specific requirements (already in)	Already in website	Already in.	None for the framework.
Audit trail (already in)	Already in website	Already in.	None material.
Officer remains final decision	Already in website	Already in. Keep this even after adding score / risk / AI advisory.	None. Do not automate qualify / disqualify.
